

BRAND GUIDELINES · V1.0 @MAKETIMETOMOVE

MAKETIME TOMOVE

STRENGTH · MOBILITY · MINDSET

◻◻ BRAND BRIEF

Copy this summary into any new chat, brief or design tool so that future work matches the brand.

MAKE TIME TO MOVE (MTTM) · @maketimetomove

Personal training brand and healthy-living movement. The name is a command that answers the most common reason for not exercising: "I don't have time."

Pillars: Strength, Mobility, Mindset. Signature series: stranger interviews asking "Why do you make time to move?"

Feel: minimalist, clean, confident, high-end, quiet. Restraint over loudness. Never gym-floor aggressive.

LOGO: custom equal-width capitals, thin monoline (stroke = 12% of letter height), derived from Michroma. Every letter sits in a 1x1 square box. Letter gap = 1 letter, line gap = 1 letter.

Wordmark (primary): MAKETIME over TOMOVE, centred, no word gap. 15 x 3 units.

Monogram: M T over T M, same spacing, a 3 x 3 square. Used for avatar, favicon, labels, small merch.

Single line: MAKETIME, one empty box, TOMOVE. For hats, sleeves, website header, narrow spaces.

Heavy cut: same letters with a thicker stroke, for favicons and embroidery only.

Clear space = 1 letter height on all sides. Always use the supplied files. Never retype the logo in a font.

COLOUR (two colours per layout, plus one grey for secondary text):

Master: Ink #0E0E0D + Bone #EFEFE3 (grey Stone #8F8B83).

Strength: Bone on Ink. Start Here: Ink on Bone.

Mobility: Ink #0E0E0D on Sage #B7C0AE (grey Fern #5F665A).

Mindset: Mist #E3E7EC on Midnight #121A26 (grey Slate #87909C).

Interviews: Chalk #E8E6DD on Moss #1E2A23 (grey Lichen #8C948D).

Utility: pure Black #000000 and White #FFFFFF for one-colour reproduction.

No gradients, effects, shadows, outlines or extra colours.

TYPE: MTTM Lettering (the brand's own font, built from the logo letters; files in fonts/) for headlines, labels, title cards and slogans. Capitals only, spacing built in (leave letter-spacing at 0). Regular for general use, Heavy only for small sizes and embroidery. Manrope (Google Fonts) for body text and anything read as sentences (400/500/600). Michroma is retired.

VOICE: short, direct, imperative, calm. No hype, no fitness clichés, no exclamation marks. Examples: "Make time to move." "Start where you are." "Why do you make time to move?"

IMAGERY: natural light, real people, honest movement, muted or black-and-white colour, generous negative space. No stock gym imagery, no neon, no flexing for the camera.

RULES FOR AI ASSISTANTS AND DESIGNERS

1. Use the supplied logo files (SVG or PNG). Never draw, retype or approximate the logo.
2. Headlines and labels: MTTM Lettering, capitals, letter-spacing 0. If the font is not available, use Michroma in capitals with letter-spacing 0.3em as a stand-in and say so.
3. Body text: Manrope. Never use any other typeface.
4. One theme per layout. Default to Ink & Bone unless the content belongs to a pillar.
5. Keep on-image text to 8 words or fewer, in the brand voice.
6. Instagram stories and reels (1080 x 1920): keep text out of the top 250 px and bottom 340 px; keep reel cover text inside the centre 1080 x 1080.
7. Keep 1 letter height of clear space around every logo. No gradients, shadows, outlines, effects or extra colours.
8. When unsure, choose less: more space, fewer elements, one message.

01 CONCEPT

Make Time To Move is a training habit for a healthy way of life. It is a movement first, and a coaching business second. The name is a command. It answers the most common reason people give for not exercising, “I don’t have time,” with a calm instruction instead of a pitch.

- Strength: training that builds capability for everyday life.
- Mobility: moving well, recovering well, staying able.
- Mindset: the habit itself. Its signature format is street interviews with strangers, asking “Why do you make time to move?”

The identity follows the same idea. One unit of space repeats everywhere: every letter is the same size, and every gap is the same size. The structure is visible, calm and unhurried. Nothing shouts.

02 LOGO SYSTEM

Four marks drawn from one set of custom letters. Always use the supplied files and never retype the logo.

MARK	USE	FILES
Wordmark (primary)	Default for everything with room: website hero, posters, merch fronts, decks.	logo/wordmark/
Monogram M T / TM	Instagram avatar, favicon, labels, chest prints, highlight covers, sign-offs.	logo/monogram/
Single line	Hats, sleeves, back yokes, website header bar, email footers, narrow spaces.	logo/single-line/
Heavy cut	The same letters with a thicker stroke. Only for favicons (≤ 64 px) and embroidery.	logo/monogram-heavy/ , logo/wordmark- heavy/ , logo/single-line/*-heavy-*

MONOGRAM

MONOGRAM · HEAVY CUT

SINGLE LINE

The unit U is the letter height. Everything in the identity is measured in U.

- Every letter sits in a 1 U × 1 U square. All letters share that width and height.
- Gap between letters: 1 U. Gap between the two lines: 1 U. The wordmark is 15 U × 3 U.
- Line 2 (TOMOVE) is centred under line 1 (MAKETIME) on the same columns. There is no word gap: the line break separates the words.
- Monogram: M T over T M with the same gaps, giving a 3 U × 3 U square.
- Single line: MAKETIME, one empty box, TOMOVE, giving 29 U × 1 U.
- Stroke: 12% of U for the regular weight, matching Michroma. The heavy cut is 22%.
- The letters are custom: square boxes, a circular O, a plain-stroke I, and a K made of two straight diagonals meeting the stem. No font reproduces them, so never retype the logo.

04 CLEAR SPACE & MINIMUM SIZES

Keep at least 1 U (one letter height) clear on every side of any mark. Nothing goes inside that zone: no text, edges, other logos or busy image detail. All supplied files already include it.

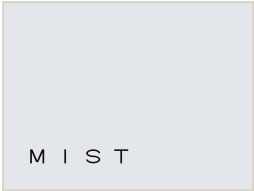

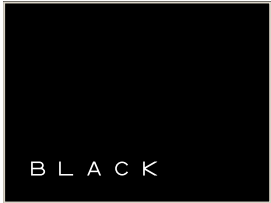

MARK	DIGITAL MINIMUM	PRINT (PAPER)	SCREEN PRINT	EMBROIDERY
Wordmark	160 px wide	40 mm wide	75 mm wide	Heavy cut, ≥ 100 mm wide
Monogram	64 px (regular) · 16–48 px heavy cut	15 mm	20 mm	Heavy cut, ≥ 25 mm
Single line	300 px wide	120 mm	150 mm (heavy cut ≥ 90 mm)	Heavy cut, ≥ 120 mm

Below the wordmark minimum, use the monogram. At 16 px the monogram reads as a recognisable square, not as letters. That is expected for any four-letter mark.

05 COLOUR

Four themes, each made of two colours plus one grey. One theme per layout; never mix themes.

 IN K HEX #0E0E0D RGB 14 14 13 CMYK* 0 0 7 95 Master dark	 B O N E HEX #EFEBE3 RGB 239 235 227 CMYK* 0 2 5 6 Master light	 S T O N E HEX #8F8B83 RGB 143 139 131 CMYK* 0 3 8 44 Grey for secondary text on Ink or Bone	 M O S S HEX #1E2A23 RGB 30 42 35 CMYK* 29 0 17 84 Interviews ground	 C H A L K HEX #E8E6DD RGB 232 230 221 CMYK* 0 1 5 9 Light on Moss

White	#FFFFFF	255 255 255	0 0 0 0	Utility: one-colour reproduction

*CMYK values are mathematical starting points, not colour-managed. For print and merch, ask the printer to match the HEX values to a physical swatch (Pantone or their own ink system) and approve a proof before a run. For large solid Ink areas on paper, use a rich black (C60 M40 Y40 K100).

- Ink & Bone is the master. Use it for the profile, the website, general posts and most merch.
- Greys are only for secondary text, captions and dividers. They are not for logos or body copy on light grounds.
- Black and white are utilities for one-colour jobs: stamps, single-ink prints and partner logos.
- Approved logo pairings are exactly the lettering/ground pairs above, plus each pair inverted, plus single-colour logos on photography with enough contrast.

ROLE	TYPEFACE	SETTING	USE

Start where you are. Ten minutes counts. Training is a habit you keep, not a phase you survive. Manrope carries everything you read at length, quietly.

- MTTM Lettering is the logo's alphabet: every character in a square box, a circular O, and 1 U gaps between characters and 3 U between words. The spacing is built into the font, so always leave letter-spacing at 0.
- Install `fonts/mttm-lettering-regular.otf` and `-heavy.otf` for Canva, Figma and desktop apps. Use the `.woff2` files on websites.
- Capitals only (lowercase keys type capitals). Keep lines short: 2 to 4 words, centred or left-aligned, never justified, never for paragraphs.
- Characters: A-Z, 0-9 and . , : ! ? ' " - - - / · @ + # () &. The zero is a rounded square so it is never confused with the circular O.
- Use Heavy only for labels smaller than about 14 px tall on screen and for embroidery.
- The logo stays fixed artwork. Never type it, even though the font has the letters.
- Web fallbacks: MTTM Lettering → Michroma, Arial Black, sans-serif. Manrope → system-ui, sans-serif.

07 I N S T A G R A M

Templates live in `instagram/`. Every PNG has a matching SVG; files ending in `-template.svg` keep editable text (install MTTM Lettering and Manrope).

REELSAFE ZONES

ASSET	SIZE	NOTES
Avatar	1080 × 1080	Monogram, Bone on Ink. Its diagonal stays inside the circular crop.
Highlight covers	1080 × 1920	Pillar colour plus monogram. Instagram shows the pillar name underneath, so the cover carries no words.

ASSET	SIZE	NOTES
Interview title card	1080 × 1920	Moss theme. Change the episode number in the template file.
Lower third	1080 × 1920, transparent	Name in MTTM Lettering, caption in Manrope. Sits above the story UI.
Reel covers	1080 × 1920	One per pillar. Keep text inside the centre 1080 × 1080 so it survives the 3:4 grid and square crops.

F E E D A E S T H E T I C

- The grid reads as calm blocks of the five theme colours, interleaved with photography. Don't chase every trend.
- Each post uses one theme, and the theme follows the pillar.
- Use typography posts for questions and principles: MTTM Lettering, centred, generous space, at most 8 words.
- Captions follow the voice: short, plain, no emoji clusters, few hashtags (3 to 5, at the end).
- Interview videos open on the title card, use the lower third for the person's name, and close on the monogram.

I M A G E R Y

- Natural light, real places, real people mid-movement. Honest effort over posed perfection.
- Grade toward muted, slightly cool colour, or black and white. Skin looks like skin.
- Leave negative space for type. Frame interviews at eye level, subject centred, handheld but steady.
- Avoid stock gym imagery, neon, heavy filters, shirtless flexing for the camera, and before/after shots.

Design tokens are in `tokens/mttm-tokens.css` and `tokens/mttm-tokens.json`. Use them to theme any site, app or deck so it matches the brand.

- Default theme: Bone text on Ink. Use Ink on Bone for long reading pages. Pillar pages may switch theme via `data-mttm-theme`.
- Header: the single-line logo at 240 to 360 px wide. Footer: the monogram. Favicon set: `logo/favicon/`.
- Layout: generous whitespace on an 8 px spacing scale, content up to about 1200 px, centred hero with the wordmark.
- UI: square corners (0 to 2 px radius), 1 px hairline rules, no shadows or gradients. Buttons are solid lettering-colour blocks with MTTM Lettering labels.
- Body text: Manrope 17 to 18 px, line-height 1.6, at most about 70 characters per line.

09 M E R C H A N D I S E

Print-ready files are in `merch/` : transparent, one colour, as SVG (vector, preferred by printers) and PNG at 300 dpi.

FILE	MARK	PRINT WIDTH	USE
<code>merch/front-wordmark/</code>	wordmark	11 in (279 mm)	Tee / hoodie full front
<code>merch/back-wordmark/</code>	wordmark	12 in (305 mm)	Tee / hoodie full back
<code>merch/chest-monogram/</code>	monogram	3.5 in (89 mm)	Left chest print
<code>merch/chest-monogram-embroidery/</code>	Heavy cut monogram	3 in (76 mm)	Left chest embroidery

FILE	MARK	PRINT WIDTH	USE
merch/hat-monogram-embroidery/	Heavy cut monogram	2.25 in (57 mm)	Cap / beanie front embroidery
merch/yoke-single-line/	single line	10 in (254 mm)	Back yoke / across shoulders
merch/sleeve-single-line/	Heavy cut single line	3.5 in (89 mm)	Sleeve or hem (heavy cut)

GARMENT	PRINT / THREAD
Ink (black, vintage black)	Bone
Bone (natural, ecru)	Ink
Moss (forest, dark green)	Chalk
Midnight (navy)	Mist
Sage	Ink

- One colour per garment. Use screen print or DTG for prints, and embroidery for caps, beanies and chest marks.
- Embroidery always uses the heavy cut artwork, because satin stitches need a stroke of about 1 mm or more.
- Match garment and ink colours to the palette by physical swatch, and approve a sample before ordering a run.
- Set slogans in MTTM Lettering, as one or two short lines, using brand-voice lines only.
- Place a small monogram woven label or neck print on garments whose front carries a slogan.

Short, direct, imperative. Calm confidence. Say less, and mean it.

MAKE TIME TO MOVE.
START WHERE YOU ARE.
WHY DO YOU MAKE TIME TO MOVE?
TEN MINUTES COUNTS.
STRENGTH. MOBILITY. MINDSET.

DO	DON'T
Short sentences. Verbs first.	Long build-ups, rhetorical hype.
Plain words a friend would use.	Fitness clichés: “beast mode”, “no excuses”, “crush it”, “grind”, “shred”.
Invite: “Start where you are.”	Shame: “What’s your excuse?”
Full stops.	Exclamation marks, all-caps shouting in body text, emoji strings.
Real people, real reasons.	Transformation promises, “summer body”, before/after framing.

1 1 W H A T N O T T O D O

- Don't add gradients, shadows, glows, outlines, textures or any other effect to the logo.
- Don't stretch, squash, rotate, skew or re-space the letters. The equal spacing is the logo.
- Don't type the logo, not even in MTTM Lettering. Always use the supplied artwork.
- Don't recolour outside the approved pairs, and don't put two theme colours in one logo.
- Don't add a word gap, or move TOMOVE off-centre.
- Don't place the logo on busy photography without enough contrast, or inside its clear space.
- Don't lock the logo up with taglines, icons or other marks. Keep each mark on its own.
- Don't use the heavy cut at large sizes on screen. It exists for small sizes and thread.

1 2 F I L E S & N A M I N G

Everything is prefixed `mttm-`, then the mark, then the colourway (`lettering-on-ground` , or a single colour for transparent files), then the size in pixels for PNGs.

FOLDER	CONTENTS
<code>logo/wordmark/</code>	Wordmark: SVG plus PNG at 600, 1200 and 2400 px wide, in 11 colourways
<code>logo/monogram/</code>	Monogram: SVG plus PNG at 128, 512 and 1024 px, in 11 colourways
<code>logo/monogram-heavy/</code> , <code>logo/wordmark-heavy/</code>	Heavy cut for favicons and embroidery
<code>logo/single-line/</code>	Single-line logo, regular and heavy
<code>logo/variants/</code>	Layout study: variant A (centred, chosen) and B (nested)
<code>logo/favicon/</code>	favicon.ico, favicon.svg, 16 / 32 / 48 px, apple-touch-icon, 192 and 512 px icons
<code>instagram/</code>	Avatar, highlights, interview title card and lower third, reel covers (+ editable templates)
<code>merch/</code>	Print-ready transparent files in Bone, Ink, White and Black
<code>fonts/</code>	MTTM Lettering font files: OTF (install for Canva, Figma, desktop) and WOFF2 (websites), Regular and Heavy, plus a specimen page
<code>tokens/</code>	CSS and JSON design tokens for websites and apps
<code>_src/</code>	Source fonts and the build scripts that generate every file

Typefaces: MTTM Lettering is the brand's own custom font, drawn in the style of Michroma (© Vernon Adams, SIL Open Font License). Manrope (© Mikhail Sharanda) is free under the SIL Open Font License.

Make Time To Move · Brand guidelines v1.0 · October 2026. Asset files and the build scripts that generate them live in the `brand/` folder.
